## THE PUTORANA PLATEAU: blank space of Russia

This expedition route is especially recommended for professional video and photo works.

July 2016 (24-hrs daylight season)

8 days/7 nights

This expedition route is especially recommended for professional video and photo works. The Putorana plateau, one of the most sparsely populated and less accessible areas in our planet, is located in Zapolyariye (transpolar region of Russia) to the south of Taimyr Peninsula. It is impossible to describe the beauty of the region's landscape: the Moon scenery of polar mountains, terrific canyons, the beauty and might of waterfalls, the heat of the Polar midnight Sun. The Putorana plateau is one of the less accessible places of the world, that's why professional photos and videos of this fantastic place are quite rare!

Qualified escort team provides participants with security services, cooking, first aid, sightseeing tours at the sites of interest, safe pass-over recommendations for difficult route sections and fishing tips

Season: July (24 hrs day time – “white nights”)  
 Tour dates: 02/07/16-09/07/16 or 9/07/16 – 16/07/16
